FOR IMMEDIATE RELEASE

Theta Edge Berhad: Driving Malaysia's Digital Future with Unmatched Delivery in National Connectivity Projects

Kuala Lumpur, 16 December 2024 – Theta Edge Berhad ("Theta") proudly announces its pivotal role in transforming Malaysia's digital landscape through the successful implementation of the JENDELA initiative. Through its subsidiary, Theta Telecoms Sdn Bhd has triumphantly completed the deployment and handover of 221 cutting-edge telecommunications infrastructures for the Jalinan Digital Negara (JENDELA) Phase 1 across seven states: Kedah, Penang, Selangor, Pahang, Terengganu, Kelantan, and Johor, marking a monumental milestone in advancing Malaysia's digital connectivity. This achievement underscores Theta's position as a reliable delivery partner capable of executing high-stakes national projects with excellence.

Building Confidence for the Future of Connectivity

Theta's early deployment of the JENDELA telecommunications towers stands as a testament to our technical excellence and strong project management capabilities. Achieving this deployment milestone in Kampung Bharu Tok Dor, Jerteh, Terengganu—well ahead of the nine-month schedule—underscores Theta's readiness to deliver critical infrastructure across Malaysia. The benefits of enhanced connectivity are already being realized by rural communities, supporting local economic development and strengthening the foundation for digital growth.

Setting New Standards in Delivery Excellence

Theta's swift completion of its first telecommunication tower—three months ahead of the expected timeline—demonstrates our commitment to efficient, high-quality project execution. Originally estimated to take nine months, our team delivered this inaugural tower in under six months, accelerating connectivity in rural regions and closing Malaysia's digital divide faster than anticipated. To streamline project execution, Theta initiated tower installations concurrently across all seven states in February 2022. This rapid deployment,

covering ancillary installations across 221 sites, showcases Theta's operational agility and capability in managing large-scale, time-sensitive infrastructure projects.

Strategic Leadership for a Digital Future

Datuk Nuraslina Zainal Abidin, Group Managing Director & Chief Executive Officer of Theta Edge Berhad, stated, "Our work on the JENDELA project is central to Malaysia's digital advancement. By enhancing internet connectivity and building robust telecommunications infrastructure, particularly in underserved rural areas, we are empowering communities, small entrepreneurs, and students with vital access to digital resources." She continued, "Theta's approach aligns seamlessly with the Malaysia Digital Economy Blueprint (MyDIGITAL). Our commitment to innovation and strategic delivery not only supports national targets but also firmly positions Theta as a leader in advancing Malaysia's digital economy."

A Reliable Partner for National Transformation

Theta's success with JENDELA Phase 1 has solidified public confidence in its ability to execute complex, large-scale projects—an essential factor as the company prepares to bid for JENDELA 2. With a proven track record and a clear commitment to operational excellence, Theta is positioned as a trusted delivery partner for the next phase of Malaysia's digital transformation.

Theta's involvement in the JENDELA initiative exemplifies its commitment to Malaysia's digital future. By working closely with the government and other stakeholders, Theta has successfully delivered and accelerated the deployment of critical infrastructure to support the next phase of growth. Not only has this collaboration boosted connectivity, but it has also catalyzed economic growth in rural areas, where businesses and communities now have access to the digital tools required for development. Through effective management, innovation, and a results-driven approach, Theta continues to raise customer satisfaction and expand its market reach. The foundation laid by JENDELA Phase 1 has not only strengthened our market position but also set the stage for continued growth as we pursue projects that drive Malaysia's digital future forward.
